DETAILED ACTION

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

2. Claims 1, 2 and 4-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, lines 3-4, the phrase "a strength at 5% elongation in the longitudinal direction of 150 cN/10 mm or less" can not be understood since dimension for strength is normally per unit area. Clarification and/or correction requested.

3. Claims 11-22 and 24-30 are allowed.

4. Applicant's arguments filed February 19, 2004 have been fully considered but they are not persuasive. In reference to rejection of claims 1, 2 and 4-10 under 35 USC § 112 second paragraph, applicants mainly argue that applicants unit for strength does not have the dimension of the thickness, but only has the dimension of the width. That is the reason why applicant's unit for strength should be represented by "cN/10mm". Applicants further state that applicant's unit is independent of the thickness of a test piece. Thus any film which has the claimed range of the strength is encompassed by claim 1 whatever thickness the film has.

These arguments are unpersuasive because as per Table 1, Table 3 and Table 8, the test sample of films have thickness dimension of about 10 μm . Therefore "cN/10 mm" can be

changed to "cN/0.01mm thick (i.e. 10 μ m) x 10 mm" " cN/0.1 mm²" Or "decin/mm²" for correct dimension. If applicants believe these dimensions are in correct than should provide evidence showing that the strength dimension normally reported as reported in the present disclosure or showing that film of instant invention has same strength at any thickness of the film. That is the strength of film of instant invention remains constant with increasing (or decreasing) the thickness of the film (i.e. independent of the thickness of a test piece as argued).

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
